

ATIGROUP

Energy & Systems Solutions

Lapeer County reaches to ATIGROUP for Engineering and Construction Management

Lapeer County is another longtime client of ATIGROUP. The trust and communication over the years has awarded ATIGROUP with another project. We have built up a great relationship with Lapeer County over the years of working with them. The project we were awarded was worth \$600,000 which started in September, 2017 and finished up February, 2018.

ATIGROUP has a well-rounded and deep understanding for existing buildings, which our clients are always happy about.

How ATIGROUP has helped

ATIGROUP ran all HVAC, Electrical, and Plumbing inspections of the building that existed to make sure it could accommodate to the new equipment. All existing mechanical and building automation systems were revised and newly designed by ATIGROUP. We provided complete Professional Engineering Services, Auto Cad drawings and specifications so Lapeer County could put out other projects out for bids. Lapeer County turned to us for engineering and construction management. Their package rooftop and make up air units were also replaced. ATIGROUP was able to get rebates from Consumers Energy to Reduce Lapeer County's costs. We were able to remain on time and on budget with the project.
